

# COMMERCIAL SNAPSHOT — RETAIL MANAGEMENT & LEASING TIP

*‘Car parking - The size of the car park is one thing in a retail shopping center, but the convenience of the car park to customers is another. It is remarkable how challenging some car parks can be when it comes to customers visiting a retail shopping center and moving around to buy goods and services. Signage in the car park will also be a factor to check out. Check the car park out at different times of day and on different days.’*
